

Connect simply

Free yourself from server infrastructure constraints

The HAXO software suite is a scalable, intuitive access control solution, suited to businesses of every size. Immediately accessible online, it delivers simplified, high-performance access management while guaranteeing a high level of data protection.

HAXO KEY : Manage rights and events

HAXO SETUP : Create and maintain your installations

HAXO API : Integrate HAXO systems into your applications

HAXOPEN : App for end users to manage remote door opening

A new generation of software

Installer management
Add and edit installer accounts and intervention levels.

Manager accounts
Create and edit manager accounts and permission levels.

Site and equipment management
Hierarchical view of the installation. Edit the settings of each device.

Scenarios and automations
Configure scenarios based on events, automated actions.

Door control and monitoring
Free access and specific schedules, manual control, advanced search tool.

Event and alert management
Event list and logging. Report generation.

ACCESS CONTROL CONNECTED

- Create and configure your installations from your smartphone.
- Host and manage online, or on-premises.
- Keep your readers and badges, and connect your existing installations to HAXO.

SOFTWARE

INSTALLER APPLICATION

Create and maintain your installations

- SaaS mode
- Bluetooth

MANAGER SOFTWARE

Manage rights and events
Two hosting options:

- CLOUD**
Secure online connection with no installation constraints.
- ON PREMISE**
On-site hosting with HAXO BOX

USER APPLICATION

Open your doors remotely.

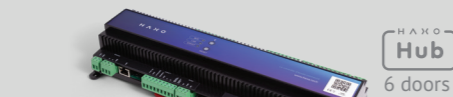

API INTEGRATION

Integrate our systems into your applications
Examples: time management, bookings...

HARDWARE

Unlimited number of HUBs

HAXO Hub
6 doors

HAXO Hub
2 doors

CONTROLLER
IP connection

PERIPHERALS

SYSTEMS

- Video
- Home automation
- Mechatronics
- Intrusion
- Intercom

READERS

- QR Code
- Badges
- Fingerprints
- Keypads
- Remote controls

RELAY

- Door strikes
- Maglocks
- Motorised locks
- Gates / Shutters
- Barriers
- Turnstiles

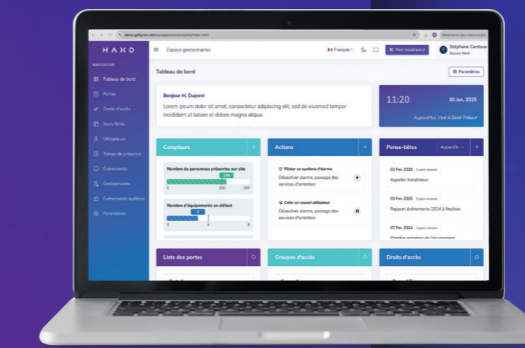

Compatibility

The HAXO solution offers the widest compatibility with readers on the market.

SIMPLIFY YOUR WORK

Simplified access for greater performance. Discover HAXO innovation across the whole range.

MADE IN FRANCE

Access control software

HAXO SETUP is an application built to make installers' work easier. A complete tool to assist commissioning, configuration and testing, as well as maintenance.

For managers, HAXO KEY offers an intuitive interface and precise control of your access system. Easy connection to the software, hosted online or on-premises, frees you from traditional installation constraints, in complete security.

HAXOPEN is an app for end users to manage remote door opening.

Controller

- Real-time Linux OS, latest generation HAX-OS
- Controller-to-controller communication over IP (global anti-passback)
- Native Bluetooth link for configuration via smartphone
- 252 reader protocols, OSDP, SSCP, Wiegand (upgradeable)
- 2-door or 6-door version
- 200,000 scalable users for 6 readers
- Offline operation without time limit
- Large-format plug-in connectors
- Secure IP, TLS V1.3 (ECC 384)
- Built-in SAM (digital vault)
- AES 128 encrypted RS485 bus

Gateway

Its technology integrates and pairs other systems (video, intrusion, home automation, intercom, management...) with simplicity.
